

Rediscover Your Customer's Network with the Fortinet Cyber Threat Assessment Program

Help you customers gauge their current Security, Productivity and Performance

Are you concerned that your customer's current security infrastructure may not accurately detect today's sophisticated attacks? Do you know how applications are being utilized on their network? How does their enterprise security stack up against similar organizations? If these questions have been unanswered, the Cyber Threat Assessment is for them!

Validate your customer's network's current security accuracy, application usage and performance by enlisting expert guidance. A Fortinet expert will use a FortiGate to monitor key indicators within their network. After several days of gathering information, they will receive a Cyber Threat Assessment Report to share with your customer, which is divided into three primary sections:

Security and Threat Prevention – How effective is their current network security solution? Learn more about which application vulnerabilities are attacking their network, which malware/botnets were detected and even pinpoint "at risk" devices within their network.

#	Severity	Threat Name	Type	Victim	Source	Count
1	5	Adobe.Flash.Player.Authplay.DLL.SWF.Handling.Code.Execution	Other	1	1	2,035
2	5	IBM.Rational.ClearQuest.Username.Parameter.SQL.Injection	SQL Injection	30	1	195
3	5	Bash.Function.Definitions.Remote.Code.Execution	OS Command Injection	8	3	15
4	5	MS.GDIPlus.JPEG.Buffer.Overflow	Buffer Errors	3	2	10
5	5	MS.IE.MSXML.Object.Handling.Code.Execution	Buffer Errors	1	1	2
6	5	McAfee.Web.Reporter.EJBInvokerServlet.Object.Code.Execution	Code Injection	1	1	1
7	4	LaVague.PrintBar.PHP.File.Inclusion	Code Injection	30	1	183
8	4	ISAdmin.ISM.DLL.Access	Information Disclosure	29	1	169
9	4	GameSiteScript.Index.PHP.SQL.Injection	SQL Injection	30	1	169

User Productivity – How are applications and web resources used within their network? Discover how peer to peer, social media, instant messaging and other application subcategories are being utilized within their network.

Network Utilization and Performance – How should their network security solution be optimized for performance? Find out more about the throughput, session and bandwidth requirements during peak hours.

How can Fine Tec help you to get started?

- Contact Fine Tec to get started with a Cyber Threat Assessment by filling out a short application, for which you can click [here](#).
- We will help you install the unit at your customer's site.
- Have Questions? or to learn more, contact us at sales@finetec.com or call us at 1-888-891-9988.
- Obtaining a Cyber Threat Assessment Report will give you unmatched insight into your customer's current security posture and network activity. Learn more by running a Cyber Threat Assessment today.
