

# Have You Grown Beyond the Capabilities of Cisco's ASA-X?

## Move from Cisco ASA-X to FortiGate

- Increase the effectiveness of your security

- By integrating all of your network security functions into a single platform the FortiGate products can provide superior threat intelligence protection

- Reduce management complexity

- Security management is complex enough as it is, with FortiOS combine your firewall policies and security reporting into a single pane of glass

- Boost performance with speeds 8-10x Faster and 3x IPS throughput

- Bandwidth speeds are always increasing, and so are security threats. Keep up with future inspection needs and leverage FortiASICs within your infrastructure

With only one platform, one network operating system, and one overarching defense strategy, FortiGate protects your entire enterprise against cybersecurity threats. And you can manage it all with complete visibility and control from a single pane of glass.

Capability	FortiGate	Cisco ASA-X with FirePower
One Operating System	✓	✗
One Platform Support (Cloud, Small-Large Carrier)	✓	✗
Single Pane of Glass	✓	✗
Industry Leading Performance & TCO	✓	✗
3rd Part Validated Security Effectiveness	✓	✗

## Fortinet Receives NGFW Recommendation from NSS Labs for Highly Effective Security

NSS Labs' Next Generation Firewall (NGFW) comparative real-world testing reveals that Fortinet delivers a winning combination of security, network performance, and total cost of ownership (TCO).
